# External Trade of Macao in the Second Quarter of $\mathbf{2 0 0 5}^{\text {a }}$ 

## A. External Trade

## Imports and Exports

External trade value of Macao in the second quarter of 2005 amounted to MOP 11.28 billion, down $13.4 \%$. Imports and exports had different performance, where the value of imports grew $3.0 \%$ to MOP 7.39 billion, down from $4.8 \%$ recorded in the previous quarter, whilst exports slumped further from $18.0 \%$ recorded last quarter to $33.6 \%$ to MOP 3.89 billion. The export-import ratio plunged further to $52.6 \%$ from $58.4 \%$ in the first quarter of 2005 . Trade deficit expanded from MOP 2.49 billion to MOP 3.51 billion, a considerable year-on-year increase of MOP 2.18 billion.

Performances in Macao's two traditional major export markets, namely the US and the EU, were again less than favourable. Value of exports to the US plunged $36.0 \%$ to MOP 1.79 billion; value of exports to the EU plummeted $70.5 \%$ to MOP 357 million, which has fallen below the value of exports to Mainland China since the first quarter of 2005 (exports to Mainland China fell $11.6 \%$ in the second quarter to MOP 803 million). Value of exports to Hong Kong slid 2.5\%. In terms of type of exports, value of textile and garment products, which made up $72.4 \%$ of the total export value, fell markedly by $40.3 \%$. Meanwhile, value of other exports decreased $5.6 \%$.

[^0]
## Domestic Exports

In the second quarter of 2005, domestic exports accounted for $62.7 \%$ of the total export value, at MOP 2.44 billion, down $43.6 \%$. Garment and textile products, which constituted $87.4 \%$ of total domestic exports, slumped by $45.3 \%$ in value, among which exports to the US diminished $36.5 \%$ and those to the EU plummeted by $72.3 \%$.

Despite the liberalization of the textile and garment quota system in 2005, domestic exports in the second quarter of 2005 still concentrated in these formerly restricted products, whose value consisted of $75.5 \%$ of the total value of domestic exports and fell $42.5 \%$; exports to the US fell $29.7 \%$ and those to the EU slumped by $73.4 \%$.

In terms of domestic exports of the formerly unrestricted garment and textile products, total export value plunged by $58.0 \%$, among which exports to the US tumbled down $67.4 \%$ and those to the EU plummeted by $62.4 \%$.

In terms of non-textile products, exports of machinery, apparatus \& parts, which made up $1.4 \%$ of total domestic exports, fell $12.4 \%$ in value. Value of footwear exports, which constituted $0.4 \%$ of total domestic exports, plummeted further from $91.0 \%$ in the first quarter to $95.3 \%$ in the second quarter.

In addition, results from the Industrial Export Survey of the second quarter of 2005 indicated that the average length of time of the orders on hand of the interviewed manufacturers was 3 months, down $6.3 \%$ from 3.2 months in the previous quarter and down $11.8 \%$ from 3.4 months in the same period of 2004 respectively. The change could be arguably attributed to the liberalization of the garment and textile quota system in 2005. Meanwhile, among the interviewed manufacturers, 39.8\% and $14.7 \%$ predicted slight and substantial growth respectively in the domestic industrial exports in the next 6 months whereas $21.1 \%$ and $24.4 \%$ predicted very slow and stagnant growth respectively. In view of these, more than half of the interviewed manufacturers expressed optimism towards the prospects of exports in the next 6 months.

## Re-exports

In the second quarter of 2005 , re-exports, which made up $37.3 \%$ of the total export value, shrank $5.1 \%$ in value, in contrast with the $4.7 \%$ growth in the previous quarter. Mainland China and Hong Kong remained to be the two largest re-export markets, constituting $51.8 \%$ and $29.1 \%$ of the total re-export value respectively. Re-export value to Mainland China dropped $14.4 \%$ whilst that to Hong Kong fell 3.3\%.

In terms of types of goods, raw materials \& semi-manufactures, the main re-exports, which made up $58.5 \%$ of the total re-export value, shrank $19.5 \%$ in value. Re-exports of capital goods,
fuels \& lubricants and consumer goods recorded growth of $12.1 \%, 51.9 \%$ and $27.9 \%$ respectively.

## Imports

In the second quarter of 2005, import value grew $3.0 \%$. Mainland China continued to be the largest source of imports for Macao. Imports from Mainland China, accounting for $42.6 \%$ of the total import value ( $38.0 \%$ in last quarter), slid $4.3 \%$. As regards other import markets, the EU and Japan went up $25.2 \%$ and $30.7 \%$ respectively, whereas Hong Kong, Taiwan China and the US fell $2.4 \%, 13.7 \%$ and $7.5 \%$ respectively.

In terms of types of goods, raw materials \& semi-manufactures, the main imports, which made up $35.8 \%$ of the total import value, diminished $11.0 \%$ in value. Consumer goods, which accounted for $35.0 \%$ of the total import value, slid $2.0 \%$. In contrast, capital goods and fuels \& lubricants, which made up $19.2 \%$ and $10.0 \%$ of the total import value, surged $33.6 \%$ and $47.8 \%$ respectively.

Note: The external trade statistics of 2005 are subject to revisions later on.
a Since May 1, 2004, the European Union has included ten new member states: Cyprus, Czech Republic, Estonia, Hungary, Lithuania, Latvia, Malta, Poland, Slovenia and Slovakia. Therefore, it is not advisable to compare the growth rates recorded in 2004 with those in 2002 and 2003. It is also not advisable to compare the growths rates recorded in the third, fourth quarters of 2004, and the first, second quarters of 2005 with the growth rate recorded in the second quarter of 2004.

Note: The external trade statistics of 2005 are subject to revisions later on.
a Since May 1, 2004, the European Union has included ten new member states: Cyprus, Czech Republic, Estonia, Hungary, Lithuania, Latvia, Malta, Poland, Slovenia and Slovakia. Therefore, it is not advisable to compare the growth rates recorded in 2004 with those in 2002 and 2003. It is also not advisable to compare the growths rates recorded in the third, fourth quarters of 2004, and the first, second quarters of 2005 with the growth rate recorded in the second quarter of 2004.

[^7]
[^0]:    ${ }^{\text {a }}$ Unless otherwise specified, all rates of change are in nominal terms and on the year-on-year basis, i.e. comparisons of the second quarter of 2005 with the same quarter of 2004.

[^1]:    Note: The external trade statistics of 2005 are subject to revisions later on
    a Trade balance $=$ Total exports - Total imports
    $b$ Exports $/$ Imports ratio $=$ Total exports $/$ Total imports $\times 100$
    c Terms of trade index $=$ Unit value index of exports $/$ Unit value index of imports $\times 100$
    $r$ Rectified data

[^2]:    Note: The external trade statistics of 2005 are subject to revisions later on
    a Since May 1, 2004, the European Union has included ten new member states: Cyprus, Czech Republic, Estonia, Hungary, Lithuania, Latvia, Malta, Poland, Slovenia and Slovakia. Therefore, it is not advisable to compare the growth rates recorded in 2004 with those in 2002 and 2003. It is also not advisable to compare the growths rates recorded in the third, fourth quarters of 2004, and the first, second quarters of 2005 with the growth rate recorded in the second quarter of 2004.
    $r$ Rectified data

[^3]:    Note: The external trade statistics of 2005 are subject to revisions later on.
    a Since May 1, 2004, the European Union has included ten new member states: Cyprus, Czech Republic, Estonia, Hungary, Lithuania, Latvia, Malta,
    Poland, Slovenia and Slovakia.

[^4]:    a Since January 1, 2005, exports of textiles and garments are not restriscted by quota system.
    Cat. 333/4/5/833/4/5-Men's or boys', women's or girls' coats, cotton, silk blends and other vegetable fibres
